

# Syed Faraz.

Software Engineer  
Generative AI & ML Systems

## CONTACT

-  syedfaraz1900@gmail.com
-  linkedin.com/in/syed-faraz18001
-  github.com/faraz18001
-  Karachi, Pakistan

## TECH STACK

### AI / LLMS

- LangChain
- OpenAI
- HuggingFace
- Ollama
- Vertex AI
- FAISS
- RAG

### BACKEND

- Python
- FastAPI
- DuckDB
- SQLite

### FRONTEND

- React
- Next.js
- Vite

### DEVOPS & TOOLS

- Docker
- Git
- Neo4j
- Jupyter

## CERTIFICATIONS

Social & Behavioral Research (RCR)  
CITI Program · Jan 2025

Technical Support Fundamentals  
Google · Apr 2024

## PROFILE

Software Engineer at Wavetec specialising in production-grade Generative AI systems. I design and ship end-to-end RAG pipelines, LLM-powered agents, and ML forecasting systems — integrating LangChain, OpenAI, and Vertex AI into real products used by real teams. Currently pursuing a BS in Computer Science at Habib University (2028).

## EXPERIENCE

### Software Engineer

May 2024 — Present

Wavetec · Full-time · Karachi, On-site

- Built D.A.S.H — a full-stack NL-to-SQL platform using LangChain, GPT-4, and FAISS, enabling business analysts to query transaction databases in plain English without writing SQL.
- Developed WaveFix, a RAG-powered support agent that ingests PDF, Markdown, and HTML knowledge bases, reducing repetitive support load via a hybrid semantic + keyword retrieval system.
- Engineered a Prophet-based ticket volume forecasting system with automated retraining and drift detection, surfaced through an interactive React dashboard with confidence intervals.

### R&D Intern

Mar 2024 — Apr 2024

Wavetec · Internship · Pakistan

- Researched Generative AI frameworks and LLM integration patterns to support the engineering team's AI roadmap.
- Prototyped early-stage AI tooling using LangChain and OpenAI APIs, contributing to production system designs.

### Technical Support Specialist

Sep 2023 — Mar 2024

The Citizens Foundation · Internship · Pakistan, On-site

- Provided technical support and IT consulting across the organisation, maintaining network infrastructure and end-user systems.
- Implemented automation tooling to streamline repetitive support workflows, reducing manual effort across the team.

## PERSONAL PROJECTS

### Book Whiz

LangChain · HuggingFace · FAISS · RAG

AI-powered book recommendation engine using vector search over an extensive book database. Leverages HuggingFace embeddings and FAISS for semantic search with a chat interface.

### Sales Llama

LangChain · Neo4j · Groq · Graph DB

Amazon Product Knowledge Graph Agent that uses Neo4j and advanced embeddings to provide intelligent, context-aware product recommendations via a LangChain agent.

### Vetlog-AI

Python · OpenAI GPT-4o · WhatsApp Business API · FastAPI

AI-powered report summarizer delivered entirely through WhatsApp Business API. Users send documents and receive clean GPT-4o summaries — no app installation required.

### Worksheet Generator

Python · PyMuPDF · Flask · 0/1 Knapsack DP

Parses Cambridge O/A-Level past paper PDFs using a custom inverted index and 5-point bucket sorting algorithm. Selects optimal question subsets via 0/1 Knapsack DP and compiles clean A4 PDF worksheets — stripping watermarks, barcodes, and margin text.

## EDUCATION

### BS Computer Science

Apr 2024 — Aug 2028

Habib University · Karachi
